

BABY LOCK SEWING ACCESSORIES

Quilting or Patchwork 1/4" Foot with Guide

(ESG-QGF)

Instructions

MACHINE SETTINGS

Stitch:	Center position straight stitch
Stitch length:	Pre-set
Stitch width:	Pre-set
Tension:	Pre-set

The Baby Lock 1/4" foot with guide is an excellent addition for any sewer that wants to have perfect 1/4" seams or topstitching.

Select the straight stitch in the center needle position when using this foot.

For 1/4" seams:

Align the raw edges of the two fabric layers against the guide at the right side of the foot. Lower the foot and sew, making sure the raw edges stay against the guide.

Pivoting:

To pivot at a corner for either quilting or topstitching, and maintain an exact 1/4" seam, sew until the edge of the fabric aligns with the mark on the narrowest part on the front of the foot.

Keep the needle down in the fabric, raise the presser foot, pivot, and continue stitching with the edge of the fabric against the guide.

Topstitching:

For topstitching to be an exact 1/4" from the edge of the fabric, align the fabric edge against the guide. Lower the foot and sew, making sure the fabric edge stays against the guide. See above instructions for pivoting corners.
