

BABY LOCK SEWING ACCESSORIES

Seam Guide

(BLQP-SG)

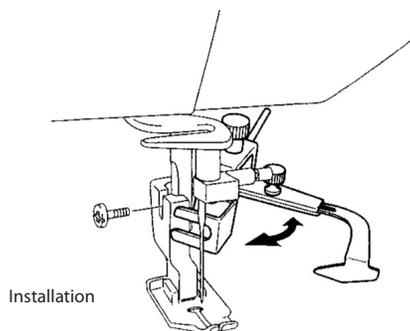

Instructions

Attach this adjustable seam guide to the throat plate of your machine to achieve precise seams. Simply run your fabric along the guide edge for perfect seam allowances every time.

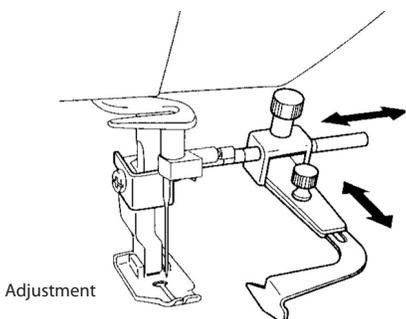

INSTRUCTIONS:

1. Attach the seam guide as shown in the illustration and tighten the presser foot screw securely with a screwdriver. If the screw is not securely tightened, the presser foot and guide may fall off the presser foot bar causing damage to the machine.
3. Sew the first row and move the fabric to the right. Sew successive rows with the guide riding along the previous row of stitching.

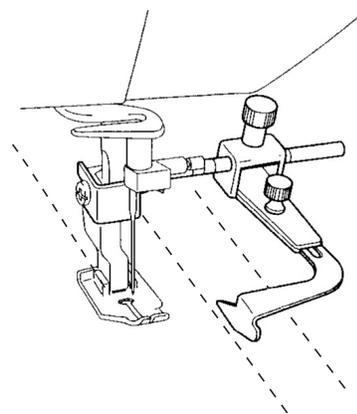

Installation

2. To adjust, lightly loosen both screws to move the guide left, right, forward or back. (See arrows in illustration). Remember to tighten the screws before stitching.

Adjustment

FOR THE LOVE OF SEWING
