Descriptions:

1/4" Foot with Guide:

Eliminate swerving by running your fabric alongside the included guide. This foot ensures an exact 1/4" seam when piecing a quilt or a perfect 1/4" topstitch.

Open Toe Foot:

The open width and clear plastic of this foot make it perfect for projects that require visibility and stability, such as appliqué, surface embellishments, and stitching around intricate areas with decorative stitches. It even has a larger groove on the underside to accommodate thicker stitches and decorative threads.

Descriptions:

Straight Stitch Foot:

If you want to reduce puckering on lightweight fabrics and prevent delicate fabrics from "jumping" and shifting, this foot is for you. The small opening on the foot provides support as the needle travels through the fabric, preventing flagging. The center needle position leaves no guesswork.

Stitch Guide Foot:

For projects that require the utmost accuracy, such as garments, topstitching or piecing while quilting, this foot comes prepared to help. The built-in ruler is perfect for keeping your measurements precise at all times.

Adjustable Bias Binder:

Attach 1/4" to 3/4" wide bias binding in place with either straight or decorative stitches using this adjustable foot. This is the foot for attaching pre-packaged and pre-pressed binding. It's capable of handling a variety of binding widths and decorative stitches.

Free-Motion Darning Foot:

This clear-view foot offers excellent visibility and control. The spring load will prevent flagging and help keep fabric flat and under control. Great for performing stippling, meandering, and thread painting techniques simply and precisely.
