

Baby Lock Solaris (Model BLSA) Software Update Version 1.21

September 2018

Introduction

If the software version of your Solaris (Model BLSA) is earlier than version 1.21, an update program is now available for download to improve its performance.

Version 1.21 update will provide the following changes:

1. Improved machine's functionality for the following features.
 - Embroidering applique patterns
 - Auto split of quilt sashes function
 - Embroidery carriage Initial set-up
2. Revised the built-in operation manual.

How to confirm the software version of your BLSA

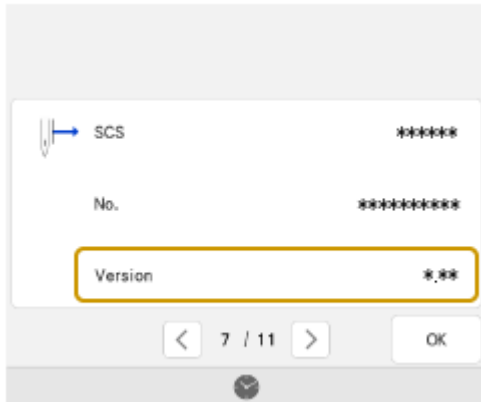

1. Press the power switch to "I" to turn on your machine.
2. If the opening movie is played, touch anywhere on the LCD screen.
3. Press  (Machine setting screen key) to display the machine's settings screen.

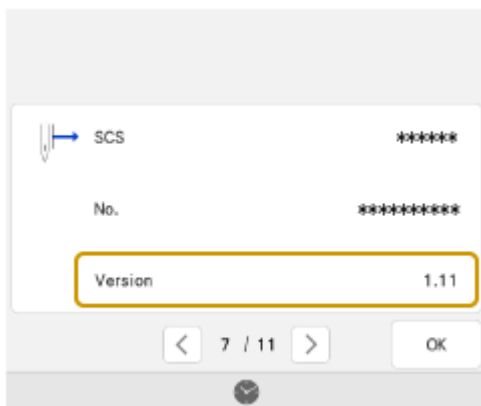

4. The machine's settings screen appears.
5. Switch the settings screens by using  (Previous page key) or  (Next page key) to display the machine's program version.

6. Check the version shown on the display as described below.

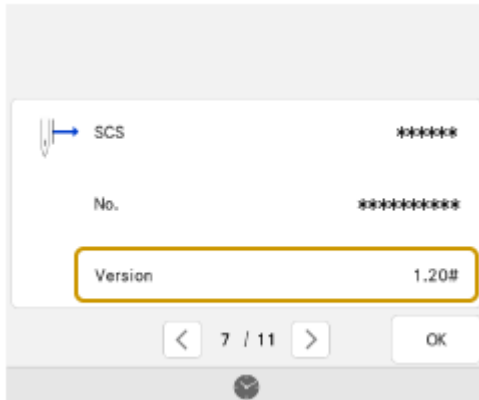

- If "**Version**" is already "**1.21**" or later, it is not necessary to update your machine with the software on this page.
- If "**Version**" is lower than "**1.21**", update your machine's software with the software on this page.
- If "**Version**" shown in the screen is lower than 1.20, it is necessary to update your machine's software with the software on this page in first. And then, you need to install the tutorial videos data into your machine.
After installing this software into your machine, go to Download page for the tutorial videos data installation.

- If the version number is displayed with "#" like "**1.20 #**", it is necessary to install the tutorial videos data into your machine in addition to installation of this software update.
After installing this software into your machine, go to Download page for the tutorial videos

data installation.

How to download the update program

1. Create a temporary folder (ex. C:\Temp) on your computer to save the program file to be downloaded.
2. Click the Download link on the download page for your machine.
3. Select the previously created temporary folder (ex. C:\Temp) where the downloaded file should be stored, and then download the file.

Download file: XP_V121_taco_P.upf, size: 129 MB)

How to update your machine's software

You can use a USB Flash drive to update your machine's software.

***** NOTE *****

- Do not turn off your machine while the machine is saving the update software to itself. If the machine's power is turned off while saving the update software, it may result in damage to the machine.
- Use a 4GB or larger USB flash drive when updating the machine.
- Check that no data except for the update file is saved on the reformatted USB Flash drive, before beginning update.

1. Insert the USB Flash drive into the USB port on the computer.
2. Copy the update file to the USB Flash drive.
3. Safely remove the USB Flash drive from the USB port on the computer.

4. While pressing the "Automatic Threading" button, turn the main power to ON.

5. The upgrade screen will appear on the LCD. Press  or  .
